Please!! EPA make a difference and stop this corrupt process.

If we continue to burn this coal in this unregulated manner, it will contaminate the WHOLE planet, not just Montana. Coal-fired utility plants are already releasing 48 TONS, or 80,000 pounds, of mercury a year into the air. Where do you think this mercury winds up? Much of it goes into the water system and now even pristine lakes in the mountains, far removed from society, they are contaminated with mercury as a result of the winds, which blow this mercury around. Please, Please!! EPA make a difference and stop this corrupt process. Their is lack of environmental and human concern in the new mercury emissions regulations and these proposed regulations are irresponsible and unacceptable. These mercury emissions are threatening the air, water and fish that our children and future generations will depend on for survival. Do it for our nations precious children. Remember, they are americas future? America including I need you to change these regulations and protect our health and the environment before it's too late, but I want you to act now!!. If you allow these regulations to pass my environment and health will be further threatened. Don't disregard this as unimportant and mere health politics. You need to protect the entire planet and stop the unnecessary release of toxic chemicals into our environment. Please we need the EPA to have stricter regulations to stop mercury emissions from coal-fired power plants!
